

Walter Fuscaldo

Personal Information

First Name Walter
Last Name Fuscaldo
Place and Date of Birth Rome (Italy), 13 May 1987 (33 years old)
Address Via Arnaldo Cervesato, 38, 00159 Rome (Italy)
Nationality Italian
Mobile +39 (320) 7858896
E-mail wal.fuscaldo@gmail.com
Tax Code FSCWTR87E13H501W

Working Activities

- Jul. 2020 – Today **Research Fellow**, *Institute for Microelectronics and Microsystems*, Italian National Research Council.
- Duration –
- Activities Analysis and design of low-profile reconfigurable antennas for satcom applications; analysis and design of terahertz filters; terahertz characterization of materials
- Achievements ○ Topic Editor – *MDPI Crystals* journal
- Feb. 2020 – Jun. 2020 **Postdoctoral Researcher**, *Department of Information Engineering, Electronics, and Telecommunications*, Sapienza University of Rome, Rome, Italy.
- Duration 6 months
- Activities Generation of Bessel-Gauss beams at microwaves; design of terahertz antennas; analysis of planar waveguiding structures; analysis and optimization of the radiating properties of leaky-wave antennas; design and prototyping of a phased array for software-defined radar applications.

- Achievements
- Teaching an M. Sc. course (6 hours) on Microwave and Antenna Engineering at Rome Tre University.
 - Supervision of 2 M. Sc. students at Sapienza University of Rome.
 - Organization of a conference special session at EuCAP 2020, Copenhagen, Denmark.
 - 5 peer-reviewed international journal papers (1 published, 3 under review, 1 under preparation)
 - 10 peer-reviewed international conference papers (2 presented, 5 accepted, 3 under review)
 - 1 award (see section [Awards](#) for further details): the Young Scientist Award at the *General Assembly and Scientific Symposium of the International Union of Radio Science (URSI-GASS)*, Rome, Italy.

Jan. 2019 – Jan. 2020 **Postdoctoral Researcher**, *Department of Information Engineering, Electronics, and Telecommunications*, Sapienza University of Rome, Rome, Italy.

Duration 12 months

Activities Time-domain analysis of ground penetrating radar (GPR) data; analysis of radiating properties from unconventional leaky-wave antennas; design of THz leaky-wave antennas; generation of Bessel-Gauss beams at microwaves.

- Achievements
- Associate Editor – *IET Electronic Letters* journal
 - Teaching an M. Sc. course (6 hours) on Microwave and Antenna Engineering at Rome Tre University.
 - Organization of a conference special session at PIERS 2019, Rome, Italy.
 - 11 peer-reviewed international journal papers (8 published, 2 under review, 1 under preparation)
 - 12 peer-reviewed international conference papers (6 published, 5 to be presented, 1 under review)
 - Collaborator in 2 national projects (see section [Projects and Grants](#) for further details), one focused on GPR-data analyses and one focused on wireless power transfer.
 - 3 awards (see section [Awards](#) for further details): 1) the Young Scientist Award in Electromagnetics at *41st Photonics and Electromagnetic Research Symposium (PIERS 2019)*, Rome, Italy; 2–3) the Publons Review Awards 2019 for placing in the top 1% reviewers in Engineering and Cross-field on Publons.

Jan. 2018 – Jan. 2019 **Postdoctoral Researcher**, *Department of Information Engineering, Electronics, and Telecommunications*, Sapienza University of Rome, Rome, Italy.
Mar. 2017 – Sep. 2017

Duration 18 months

- Activities Graphene-based reconfigurable antennas; frequency-domain/time-domain near-field focusing through leaky-wave radiating systems; generation of vortex beams through higher-order cylindrical leaky waves.
- Achievements
- Associate Editor – *IET Microwaves, Antennas and Propagation* journal
 - 2 book chapters
 - 5 peer-reviewed international journal papers
 - 10 peer-reviewed international conference papers
 - 3 peer-reviewed national conference papers
 - Collaborator in 1 project (see section [Projects and Grants](#) for further details) with Leonardo S.p.A, Rome, Italy, the leading italian industry of Aerospace, Defence and Security.
 - 4 awards (see section [Awards](#) for further details): 1) the Best Paper (Under 35) in Applied Electromagnetics at the *XXII Riunione Nazionale di Elettromagnetismo* (RiNEm 2018), Cagliari, Italy; 2) the Best Paper Award in Electromagnetics and Antenna Theory at the *12th European Conference on Antennas and Propagation* (EuCAP 2018), London, UK; 3) the IEEE APS Student Award, Chapter Center-Southern Italy, for the best PhD Thesis in 2017; 4) the Publons Review Award 2018 for placing in the top 1% reviewers in Engineering on Publons.

Jun. 2018 – Aug. 2018 **Visiting Scientist**, *NATO STO - Centre for Maritime Research and Experimentation (CMRE)*, La Spezia, Italy.
Sep. 2017 – Dec. 2017
Sep. 2014 – Dec. 2014

Duration 9 months

Activities Ship Detection/Tracking using multistatic Global Position Satellite (GPS) signals; Electromagnetic modeling of scattering problems for ship detection in maritime scenarios through Global Navigation Satellite System Reflectometry (GNSS-R) signals and through high-resolution radars.

Achievements NATO works with sensitive information and limits access to individuals with proper security clearance. Most of the material performed in this time frame is considered of strategic importance and thus marked as NATO Unclassified (further information on NATO security classification can be found at <https://www.nato.int>). As a consequence, the related works are not publicly released by virtue of a *non-disclosure agreement*.

- 2 peer-reviewed international journal papers
- 3 peer-reviewed international conference papers
- 1 peer-reviewed national conference paper
- 1 project with the Office of Naval Research (ONR) for research activities
- planning collaborations with ONR for next year projects.
- creating a research network between NATO-STO CMRE, University of Rome Sapienza, and University of Naples Federico II.

Internships

May 2016 – Sep. 2016 **Intern/Ph.D. Student**, *University of Houston*, Houston (TX), USA

Duration 4 months

Supervisors Prof. David R. Jackson *University of Houston*, Prof. Alessandro Galli *Sapienza University of Rome*

Description Analytical framework for the evaluation of different figures of merit (beamwidth, directivity, sidelobe level, and etc.) of leaky-wave antennas.

Achievements

- 2 peer-reviewed international journal papers
- 2 peer-reviewed international conference papers
- starting a fruitful collaboration with Prof. IEEE Fellow David R. Jackson: the worldwide recognized expert in leaky waves and leaky-wave antennas.

Jan. 2015 – Jul. 2015 **Intern/Ph.D. Student**, *IETR UMR CNRS 6164*, Rennes, France

Jan. 2014 – Mar. 2014

Duration 9 months

Supervisors Alessandro Galli *Sapienza University of Rome*, and Mauro Ettore *University of Rennes 1*

Description Development of a theoretical framework for the analysis of nondiffracting waves generated through Bessel-beam launchers at millimeter waves.

- Achievements
- 3 peer-reviewed international journal papers
 - 9 peer-reviewed international conference papers
 - 1 prototype successfully measured (first experimental demonstration of Bessel beams through higher-order leaky modes at millimeter waves).

Jan. 2013 – Jul. 2013 **Intern/Thesis Student**, *IETR UMR CNRS 6164*, Rennes, France

Duration 6 months

Supervisors Prof. Alessandro Galli *Sapienza University of Rome*, and Prof. Ronan Sauleau *University of Rennes 1*

Description Analytical study and pre-design of a 40 GHz Bessel beam launcher for near-field applications.

- Achievements
- Preparation of manuscripts for peer-reviewed journals and conferences
 - Master's degree with honors (see section [Education](#)).

Mar. 2012 – May. 2012 **Intern/Master Student**, *ELT Elettronica S.p.A.*, Rome, Italy.

Sep. 2011 – Jan. 2012

Duration 6 months

Supervisors Antonio Manna and Fabrizio Trotta *ELT S.p.A.*

Description Design of 1-D and 2-D arrays of Vivaldi antennas. Design of conformal arrays of dual-polarized quadruple ridged horn over the 6–18 GHz Band. Full-wave simulation, analysis of results, and documentation.

- Achievements
- Mastering full-wave commercial solvers for electromagnetic analysis
 - Development of an antenna library for *ELT S.p.A.*

Education

Nov. 2013 – Feb. 2017 **Ph. D. in Information and Communication Technology**, *Sapienza University of Rome (Italy) and University of Rennes 1 (France)*.

Duration 3 years. This is currently the standard duration in Italy. Since 2016 PhD students must defend their thesis within the fourth year.

Title *Advanced Radiating Systems Based on Leaky Waves and Nondiffracting Waves*

Supervisors Prof. Alessandro Galli *Sapienza University of Rome* and Dr. Mauro Ettore *University of Rennes 1*

Examination Committee Prof. Giuseppe Schettini, Prof. Alessandro Toscano *Roma Tre University*, Prof. IEEE Fellow Francisco Medina-Mena *University of Seville*

Grade Ph.D. degree (*cum laude* and with the *Doctor Europaeus label*); international cotutelle agreement between *Sapienza University of Rome* and *University of Rennes 1*.

Description Investigation of near-field focusing systems generating Bessel beams through leaky modes in the millimeter-wave frequency range. Theoretical analysis and design of near-field focusing systems generating limited-dispersive, limited-diffractive X-waves. Analysis and design of reconfigurable leaky-wave antennas based on graphene and nematic liquid crystals whose main beam can electronically be steered at fixed frequency. Note that all publication records reported below also include contributions achieved during the internships performed in the PhD time frame.

- Achievements**
- I was the recipient of a 3-years PhD national grant at the University of Rome Sapienza (ranked second out of more than 40 participants). National grants are assigned in accordance to the scores of a competitive entrance exam test.
 - 10 peer-reviewed international journal papers
 - 21 peer-reviewed international conference papers
 - 5 peer-reviewed national conference papers
 - 2 awards (see section [Awards](#) for further details): 1) The Young Engineer Prize at the European Microwave Conference, 2016; 2) The Yarman-Carlin Student Award at the IEEE Mediterranean Microwave Symposium, 2015
 - 2 French mobility grants from Matisse École Doctorale
 - 2 European mobility grants from NEWFOCUS project
 - 2 annual projects (collaborator) financed by Sapienza University of Rome.

Jan. 2011 – Jul. 2013 **M. Sc. in Telecommunications Engineering**, *Sapienza University of Rome*, Rome, Italy.

Duration 2 years

Grade 110/110 “summa cum laude”.

Title *Design of Advanced Radiating Systems based on Leaky Waves for the Generation of Bessel Beams*

Supervisors Prof. Alessandro Galli *Sapienza University of Rome*, and Prof. Ronan Sauleau *University of Rennes 1*

Description Design of Bessel beam launcher using higher-order leaky-wave modes.

- Achievements
- Average mark score of 29.1/30 + 6 “laude” marks on a total of 15 exams with written and oral tests during the 2 years Laurea career
 - In 2013, the M. Sc. in Telecommunications Engineering resulted as one of the two courses of the faculty of Information Engineering of Sapienza University of Rome with the lowest scores achieved by their students (an average final grade of 105.2 and an average mark score of 25.0). Data taken from www.almalaurea.it.
 - In 2013, the Information Engineering Faculty and in particular the Telecommunications Engineering course at Sapienza University of Rome have been among the three highest-demanding M. Sc. degrees in Italy (as highlighted by the low scores achieved by their students). Data taken from www.almalaurea.it
 - 6 months internship by ELT Elettronica S.p.A., Rome, Italy, aimed at designing a 6-18 GHz dual-pol quad-ridged horn, and a 2-D array of Vivaldi antennas using a commercial CAD solver.

Sep. 2007 – Dec. 2010 **B. Sc. in Communications Engineering**, *Sapienza University of Rome*, Rome, Italy.

Duration 3 years

Title *Analytical Methods for Electromagnetic Radiation Problems*

Grade 110/110.

Supervisor Prof. Alessandro Galli *Sapienza University of Rome*

Description Multipole expansion and spherical harmonics expansion in electromagnetic problems.

- Achievements
- Average mark score of 27.2/30 + 2 “laude” marks on a total of 23 exams with written and oral tests during the 3 years Laurea career
 - Less than 1% of the students enrolled in Engineering courses at Sapienza University of Rome achieve full marks at the Bachelor Degree. Indeed, in 2010, the B. Sc. in Information Engineering resulted as the faculty of the Sapienza University of Rome with the lowest score achieved by their students (an average final grade of 97.5 and an average mark score of 23.9). Data taken from www.almalaurea.it
 - In 2010, the Information Engineering Faculty and in particular the Telecommunications Engineering course at Sapienza University of Rome have been among the ten highest-demanding B. Sc. degrees in Italy (as highlighted by the low scores achieved by their students). Data taken from www.almalaurea.it.

Sep. 2006 – Sep. 2007 **B. Sc. in Mathematics**, *Sapienza University of Rome*, Rome, Italy.

Duration 1 year

Description I started my bachelor study at the faculty of Mathematics, where I regularly succeeded the first year. Afterwards, I preferred to enroll in the Engineering curriculum where I restarted my student career from the beginning. I got the Bachelor's degree in Telecommunications Engineering within the regular three-years time frame, although I started one year later with respect to my peers.

Other Schools and Courses

Years 2014 – 2015 **ESoA Schools** (the whole list and certificates can be provided upon request Annex I)

Description I have attended two courses of the European School of Antennas. The ESoA school is the most important and biggest PhD school of Electromagnetic Engineering and Antennas in the world.

Years 2014 – 2015 **Academic Courses** (as above)

Description I have attended 5 M. Sc. and 1 PhD courses from the department of Mathematics, Physics and Engineering at Sapienza University of Rome.

Years 2012 – 2016 **Academic Online Courses** (as above)

Description I have attended 9 online courses offered by several prestigious universities through the web platform Coursera.

Awards

- Sep. 2019 **Publons Peer Review Award 2019**
- Description The prize is assigned to those who ranked in the top 1% reviewers in a given field on Publons' global reviewer database, determined by the number of peer review reports performed during the 2018-2019 Award year. In 2019 I was awarded in the *Cross-field* and *Engineering* fields.
- Jun. 2019 **Young Scientist Award in CEM, EMC, Scattering & EM Theory**
- W. Fuscaldo, D. R. Jackson, and A. Galli "New Beamwidth Formulas for 1-D Leaky-wave Antennas: A Review", *PIERS*, Rome, Italy, 17-20 June 2019.
- Description The prize is given to the best work presented at the *41st Photonics & Electromagnetics Research Symposium*. The applicant must have a PhD degree in science/engineering and under 40 years of age by the conference date. The applicant must be listed as the first author as well as the presenting author of a paper submitted for oral presentation. The committee evaluates the quality of the work as well as the CV of the applicant. In that occasion the was composed by: Prof. Qing Huo Liu *Duke University*, Prof. Yury Shestopalov, *University of Gavle*, Prof. Eng Leong Tan *Nanyang Technological University*.
- Sep. 2018 **Publons Peer Review Award 2018**
- Description The prize is assigned to those who ranked in the top 1% reviewers in a given field on Publons' global reviewer database, determined by the number of peer review reports performed during the 2017-2018 Award year. In 2018 I was awarded in the *Engineering* field.
- Sep. 2018 **Best Paper Award in Applied Electromagnetics (Barzilai Prize)**
- D. Comite and W. Fuscaldo, "Focusing Through Cylindrical Leaky Waves", *XXII RiNEm*, Cagliari, Italy, 03-06 September 2018.
- Description The prize is given to the best work presented at the *Riunione Nazionale di Elettromagnetismo*. All authors must be younger than 35 years old at the time of the presentation. The committee is composed by three national experts (in that occasion the committee was composed by: Prof. Sandra Costanzo, *University of Reggio Calabria*, Prof. Antonio Iodice, and Prof. IEEE Life Fellow Ovidio Maria Bucci *University of Naples, Federico II*). The committee evaluates the quality of the oral presentation (I was the presenter) and the originality of the work.
- Apr. 2018 **Best Paper Award in Electromagnetics and Antenna Theory**
- W. Fuscaldo et al., "Design Criteria of X-Wave Launchers for Millimeter-Wave Applications", *12th European Conference on Antennas and Propagation (EuCAP18)* London, UK, 9-13 April 2018.

Description The prize is given to the best work presented at the *European Conference on Antennas and Propagation*. The eligible works must prepare a poster in addition to the oral presentation. The originality of the work, the quality of the oral presentation, and interaction at the poster session are evaluated by a committee of recognized international experts (in that occasion the committee was composed by: Prof. IEEE Fellow Andrea Neto, *Technical University of Delft* Prof. IEEE Fellow Richard W. Ziolkowski *University of Arizona*, and Prof. IEEE Fellow Juan Mosig, *École Polytechnique Fédérale de Lausanne*).

Jan. 2018 **IEEE AP-S Student Award, Chapter Center-Southern Italy**

W. Fuscaldo, "Advanced Radiating Systems Based on Leaky Waves and Nondiffracting Waves", *PhD Thesis*, 27 February 2017.

Description The prize is given to the best research document (original article, thesis, etc.) produced in the year 2017. The works are evaluated by a committee of recognized national experts (in that occasion the committee was composed by: Prof. Alessandra Costanzo *University of Bologna Alma Mater*, Prof. IEEE Fellow Maurizio Bozzi *University of Pavia*, Prof. Paola Pirinoli *Politecnico di Torino*).

Oct. 2016 **Young Engineer Prize**

W. Fuscaldo, P. Burghignoli, P. Baccarelli, A. Galli, "Efficient 2-D Leaky-Wave Antenna Configurations Based on Graphene Metasurfaces", *46th European Microwave Conference (EuMC16)* London, UK, 3-7 October 2016.

Description The prize is given to the best paper presented by young researcher (under 30) at the European Microwave Conference. The Young Engineer Prize is the most prestigious award for a young researcher working in the field of microwaves. The European Microwave Week is the biggest european event (about 4000 attendees, and 1500 delegates) in the context of microwaves

Dec. 2015 **Yarman-Carlin Student Award (2nd prize)**

W. Fuscaldo, P. Burghignoli, P. Baccarelli, A. Galli, "Graphene-based Reconfigurable Leaky-Wave Antennas for THz Applications", *2015 IEEE 15th Mediterranean Microwave Symposium (MMS15)*, pp.282-285, Lecce, Italy, 2015.

Description The prize is given to the best paper presented by students (under 35 years old) participating at the IEEE Mediterranean Microwave Symposium. The committee is composed by four international experts (in that occasion the committee was composed by: Prof. Salvatore Caorsi, *University of Pavia*, Prof. Mohamed Essaaidi, *Abdelmalek Essaadi University*, Prof. IEEE Fellow Levent Gürel *Bilkent University*, and Prof. IEEE Fellow Siddik Yarman, *Istanbul University*). The committee evaluates the quality of the oral presentation and the originality of the work.

Projects and Grants

Italian Projects

Title			
Wireless Power Transfer for Wearable and Implantable Devices			
Years	Funder	Budget	Role
2019–2021	MIUR	800 k€	Collaborator

Title			
Expert System for the Mitigation of Risks in Agriculture			
Years	Funder	Budget	Role
2019–2020	Lazio Innova	150 k€	Collaborator

Title			
Planar Traveling-Wave Antennas with Higher or Broken Symmetries			
Years	Funder	Budget	Role
2020	Sapienza University of Rome	35 k€	Collaborator

Title			
Efficient Radiating Systems for High-Frequency Wireless Power Transfer			
Years	Funder	Budget	Role
2019	Sapienza University of Rome	15 k€	Collaborator

Title			
Advanced Leaky-Wave Radiators for 5G Wireless Communications			
Years	Funder	Budget	Role
2018	Sapienza University of Rome	15 k€	Collaborator

Title			
Focusing Electromagnetic Fields with Leaky Waves for ICT Applications			
Years	Funder	Budget	Role
2017	Sapienza University of Rome	15 k€	Collaborator

ONR Projects

Title			
Ship Detection/Tracking Using Multistatic GPS Signals			
Years	ID Number	Budget	Role
2017	N00014-16-13157	35 k€	Collaborator

**Leonardo S.p.A.
Projects**

Title			
Study of a Radiating System for Software-Defined Radar Applications			
Years	ID Number	Budget	Role
2017	COLB-CTR-2017-009-A	15 k€	Collaborator

Italian Grants

Title			
Technical Support to the Faculty of Information Engineering			
Years	Funder	Budget	Role
2017 – 2018	Sapienza University of Rome	5 k€	Collaborator

**French Mobility
Grants**
(each proposal is
evaluated by a
committee of experts in
the field)

Title			
Exact Analytical Formulas for Leaky-Wave Antennas			
Years	Funder	Budget	Role
2016	École Doctorale Matisse (City of Rennes)	800 €	PhD Student

Title			
Bessel beams and X-Wave modes at millimeter wavess			
Years	Funder	Budget	Role
2015	École Doctorale Matisse (City of Rennes)	1.6 k€	PhD Student

European Mobility Grants
(each proposal is evaluated by a committee of experts in the field)

Title			
Focus Wave Modes Through a Bessel-Beam Launcher at mm-Waves			
Years	Funder	Budget	Role
2015	European Science Foundation (Newfocus)	6.4 k€	PhD Student

Title			
Near-Field Focusing at mm-Waves by means of High-Order Leaky Modes			
Years	Funder	Budget	Role
2014	European Science Foundation (Newfocus)	3.2 k€	PhD Student

Mobility

Period	Place	Institution	Role
Jun. 2018 – Aug. 2018	La Spezia, Italy	NATO-STO CMRE	Visiting Scientist
Sep. 2017 – Dec. 2017	—	—	—
Sep. 2014 – Dec. 2014	—	—	—
May 2016 – Sep. 2016	Houston, TX, USA	University of Houston	PhD Student
Dec. 2017 – Jun. 2018	Rome, Italy	Sapienza University	Research Fellow
Sep. 2016 – Sep. 2017	—	—	—
Jul. 2015 – May 2016	—	—	PhD Student
Dec. 2015 – Jan. 2015	—	—	—
Mar. 2014 – Sep. 2014	—	—	—
Jun. 2013 – Jan. 2014	—	—	—
Jan. 2015 – Jul. 2015	Rennes, France	Université de Rennes 1	PhD Student
Jan. 2014 – Mar. 2014	—	—	—
Jan. 2013 – Jun. 2013	—	—	Master Student

Educational Activities

Mar.–May 2020 **Courses**

Mar.–May 2019

Title Laboratory of Microwave and Antenna Engineering, held by Prof. P. Baccarelli

Institution Roma Tre University, Department of Engineering (B. Sc. in Electronic Engineering).

Description Transmission lines; scattering of plane waves; guided waves and resonators; two-port networks and their matrix representations; periodic structures; computational electromagnetics.

Apr. 2017 **Lectures**

Title Electromagnetic Properties of Graphene; Graphene Leaky-Wave Antennas

Institution Sapienza University of Rome, 26–29 April, 2017, European School of Antennas (ESoA)

Course Leaky Waves and Periodic Structures for Antenna Applications organized by Prof. F. Frezza (15 attendees)

Description The ESoA school is the most important and biggest PhD school of Electromagnetic Engineering and Antennas in the world.

Achievements I ranked 10th out of 100 teachers (among which there are 17 IEEE Fellows as Nader Engheta, *University of Pennsylvania*, to name but one) for the quality of the speech. The rank is determined by the scores of the evaluation sheets that each participating student has to compile at the end of the course.

Mar. 2017 **Workshops**

Title Perspectives of Tunable Leaky-Wave Antennas based on Graphene in the THz range

Institution European Conference on Antennas and Propagation (EuCAP 2017) in Paris, France, 19-24 March, 2017

Course Workshop SWS03: Nanotechnology Applications of Antennas and Wireless Sensing, organized by P. Savi, *Politecnico di Torino* and K. Naishadham *Georgia Institute of Technology*, (20 attendees)

Description EuCAP is one of the most important conference (about 1300 participants) in the context of antennas and propagation.

May. 2014 – Today **Seminar Activity**

- Description I have given several talks in different prestigious universities
- October 2019, University of Rome Sapienza (invited talk for PhD course held by Prof. Burghignoli, 10 attendees)
 - May 2018, Roma Tre University (invited talk for the M. Sc. course held by Prof. P. Baccarelli, 10 attendees)
 - Apr. 2014 – Today, University of Rome Sapienza (invited talks for the M. Sc. courses held by Prof. P. Burghignoli and Prof. A. Galli, 15 attendees)
 - Aug. 2016, University of New Orleans (invited talk for the PhD program supervised by Prof. Leszek Malkinski, 15 attendees)
 - Sep. 2016, University of Houston (invited talk for the M. Sc. course held by Prof. IEEE Fellow David R. Jackson, 30 attendees)

Mar. 2016 – Today **Supervisor Activity**

- Description I have co-supervised 8 students (7 M. Sc., 2 B. Sc.)
- 2020 Elisa Pietrangeli, M. Sc. Student, Reconfigurable synthesis techniques for terahertz graphene-based 1-D unidirectional leaky-wave antennas, supervised by Prof. A. Galli
 - 2020 Andrea Petricca, M. Sc. Student, Multifunctional active electronically scanned arrays, supervised by Prof. A. Galli
 - 2019 Francesco Mancini, M. Sc. Student, Analysis and design criteria for the generation of higher-order cylindrical leaky waves, supervised by Prof. P. Burghignoli
 - 2018 Daniele Palombi, M. Sc. Student, Bessel-Gauss beams through cylindrical leaky waves, supervised by Prof. P. Burghignoli
 - 2017 Matteo Colantonio, B. Sc. Student, Analysis of terahertz feeders for Fabry-Perot cavity leaky-wave antennas, supervised by Prof. A. Galli
 - 2017 Paolo De Santis, M. Sc. Student, Study of TE-TM waves launchers in azimuthally-symmetric planar structures, supervised by Prof. P. Burghignoli
 - 2017 Alessandro Boesso, M. Sc. Student, Leaky-wave planar structures for the generation of nondiffracting beams, supervised by Prof. P. Burghignoli
 - 2017 Andrea Giraldi, M. Sc. Student, Study of graphene-based radiating devices for terahertz applications, supervised by Prof. A. Galli
 - 2016 Francesca Moratti, B. Sc. Student, Electromagnetic analysis of homogenized metasurfaces, supervised by Prof. IEEE Fellow P. Lampariello

Nov. 2013 – Today **Exam Evaluation Activity**

- Description I have contributed to the evaluation of different undergraduate students of Telecommunications and Electronics Engineering doing the final exam of Electromagnetics Fields held by Prof. Alessandro Galli and Prof. IEEE Fellow Paolo Lampariello, respectively, at University of Rome Sapienza.

Scientific Activities

Oct. 2018 – Today **Organizer Activity**

Description I have organized the Special Session *Localized Waves: Science and Applications* at the 41st Photonics & Electromagnetics Research Symposium (PIERS19), Rome, Italy, 17–20 June 2019. I am organizing the Convened Session *Near-Field Focusing and Pulse Generation Through Localized Waves* at the 14th European Conference on Antennas and Propagation (EuCAP20), Copenhagen, Denmark, 15–20 March 2019.

Apr. 2018 – Today **Chairman Activity**

Description I served as a Chairman for the session *Antennas for Future Applications* at EuCAP18 (London, UK), and for the Special Session *Localized Waves: Science and Applications* at PIERS19 (Rome, Italy). I will serve as a Chairman for the Convened Session *Near-Field Focusing and Pulse Generation Through Localized Waves* at EuCAP20 (Copenhagen, Denmark).

Apr. 2019 – Today **Editor Activity**

Description I serve as Associate/Topic Editor for the following journals:

- IET Microwaves, Antennas, and Propagation
- IET Electronic Letters
- MDPI Crystals

Dec. 2014 – Today **Author Activity** (the whole publications list is provided apart.)

Overview

- Bibliometric data (Google Scholar)
 - h-index: 13
 - i10-index: 14
 - citations: 346
- 94 peer-reviewed documents (3 invited book chapters, 26 published journal papers, 4 journal papers under review or under preparation, 49 international conference papers, 3 international conference paper under review, 9 national conference papers)
- First author of 18/26 journal papers
- First author of 29/49 conference papers
- Authored 15/26 journal papers on IEEE (11/26 on IEEE Trans. Antennas and Propagation), and 5/25 on American Institute of Physics (AIP) and American Physical Society (APS) journals.

Jun. 2014 – Today **Reviewer Activity**

Overview More than 200 reviews for peer-reviewed international journals and conferences (more than 50 per year in the last 4 years)

Description I frequently serve as a Reviewer (see publons.com/a/1277806) for:

- *IEEE Transactions Antennas and Propagation*
- *IEEE Transactions on Nanotechnology*
- *IEEE Antennas and Wireless Propagation Letters*
- *IEEE Journal of Lightwave Technology*
- *IEEE Access*
- *NATURE Scientific Reports*
- *OSA Journal of the Optical Society of America A*
- *OSA Journal of the Optical Society of America B*
- *IOP Journal of Physics D: Applied Physics*
- *IOP Journal of Optics*
- *IOP Material Research Express*
- *SPRINGER Nanoscale Research Letters*
- *AIP Journal of Applied Physics*
- *AIP Applied Physics Letters*
- *AIP Physics of Plasmas*
- *AIP Advances*
- *IET Microwaves, Antennas and Propagation*
- *IET Electronics Letters*
- *TAYLOR & FRANCIS Waves in Random and Complex Media*
- *MDPI Electronics*
- *WILEY International Journal of Numerical Modeling: Electronic Networks, Devices and Fields*
- *CAMBRIDGE International Journal of Microwave and Wireless Technology*
